Members that work at BRINKS CANADA (Sudbury)

February 2014

Dear Fellow Members at Brinks Canada (Sudbury),

As we wait for the decision on the company's appeal of the Canada Labour decision, we are concentrating our efforts to have our industry regulated. The Union hopes to meet with our MP's, Glenn Thibeault, Claude Gravel and France Gelinias to ask for their support in our drive to have the industry regulated. A regulated industry will level the playing field establishing better safety standards and regulations for all armoured care companies. This will help our company compete for new business contracts as everyone will incur the same basic cost.

I believe that we are on the right track to the making of a better work place. We should continue our push even with all the skepticism and sarcasm that certain individuals may cause.

If you don't try, you have already given up.

Be safe!!!

In Solidarity,

Gates St. Louis
