Sudbury Mine, Mill & Smelter Worker's Union, Local 598/Unifor President's Corner

COVID 19—PANDEMIC

April 2019

Brothers & Sisters,

We are facing unprecedented times during this crisis. I don't think any-one of us have ever witnessed anything like this, and hopefully will never again.

These are difficult times for our members, having to go to work everyday uncertain if they may get infected and bring it home to their families.

All our workplaces have precautionary measures in place which are recommended by Public Health, and beyond, such as employee screening, physical distance measures and enhanced cleaning. Please follow these precautions

as best as possible, if issues arise please contact your Health and Safety Committee.

Unifor is putting pressure on governments to make sure our members are protected during this crisis, and to make sure our healthcare members have the proper PPE.

The other big question is if someone is sent home for exhibiting symptoms, have a compromised immune system, have to care for a sick family member, have to care for a child, or are in self isolation, is how do members get paid. The directive from Glencore is to contact your site HR.

As for our other units I would recommend the same as they are unsure what they will do.

If anyone has to go on EI, I suggest you visit the Service Canada website for accurate information, as there have been changes to EI. Members can also visit www.unifor.org for more information.

We are in a time of crisis, and we all need to work together, and together we can help flatten the curve.

In Solidarity,
Marcel Charron
